

Webinar:

# Oregon's State Wildfire Hazard Map

**\*\* Tuesday, Oct. 31, 10am PDT \*\***

To enhance Oregon's wildfire resilience, the State Legislature passed the 2021 SB 762 Omnibus Wildfire Bill that enacted recommendations from the Governor's 2019 Wildfire Council. This included a \$220M investment in landscape resilience, suppression response, as well as some new regulations for the home ignition zone for community protection. Upon release of the map showing fire hazard, there was a significant public outcry, often based on misunderstandings or misinformation, that ultimately led to the map being rescinded and reworked. Join us for this webinar, where we will explore the broader intent of the legislation, its requirements for mapping, where the effort stands today, and what we continue to learn from the public's reaction.
